

Even easier than pie!

At Tomahawk Live Trap, our collapsible traps are designed to unfold or fold then store away easily, making your job just a little more sweeter.

FOLDED FOR
EASY STORAGE

Tomahawk folding traps have been researchers' primary tool for safe, reliable animal capture for over 75 years. When folded they are 1/10th the size of rigid traps allowing more traps to be carried into the field at one time. They unfold or fold in seconds with no tools or assembly required. And they are the most effective and strongest folding cage traps available.

DEPENDABLE. TOUGH. TOMAHAWK.
